

Unified Communication and Collaboration Software

Spontania is a platform that empowers enterprise users with unified communication and collaboration services. It delivers presence and instant messaging, real time voice, video and advanced collaboration services, including capabilities for sharing presentations and media files. It has been designed to work in a transparent and secure mode, through any corporate device and any network.

Competitive Advantages for Companies:

- Intensive **reduction of costs** associated with executive meetings and training programs and increased effectiveness of business processes.
- **Enhanced productivity** of distributed teams and improved competitive position resulting from collaboration in real time, at any moment, from any device and anywhere.
- Decreased organizational response times and **time to market**, enabled by real-time unified communication and collaboration services integrated, with operations and business processes.
- Offers revolutionary teleworking and remote collaboration capabilities that provide measurable cost reduction and time saving, and improved **work-life balance** for employees.
- Video Collaboration usage substantially reduces travel, benefitting the environment by **eliminating carbon emissions** that result from business activities.

Why Choose Spontania?

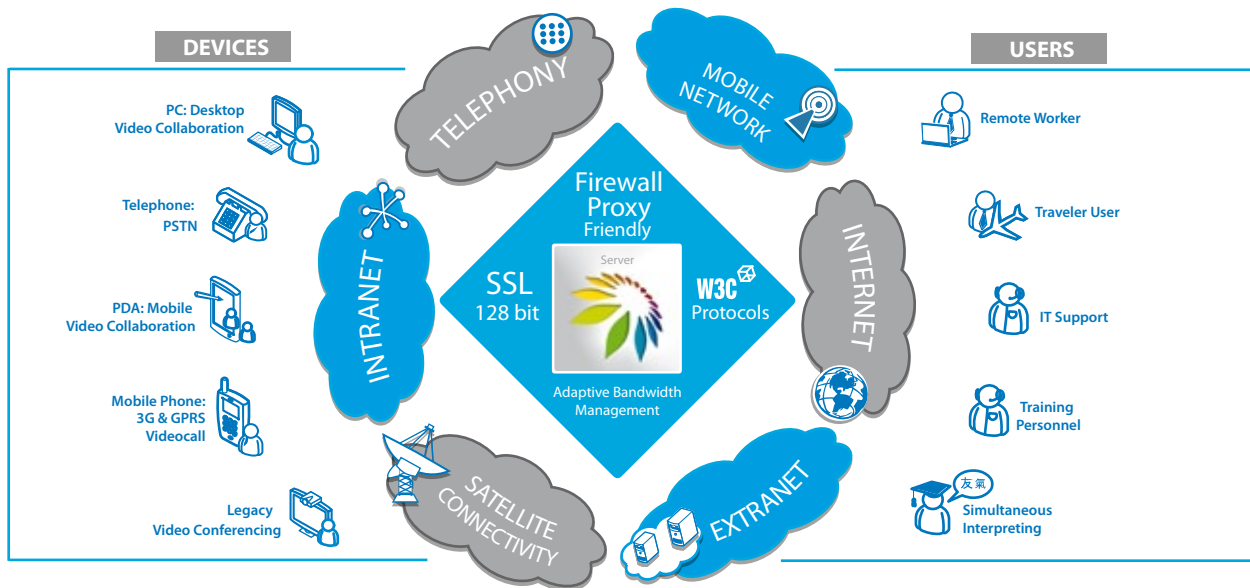

- Enables individuals to dynamically leverage both old and new communication modalities with ease
- Offers flexibility to select the communication mode that best suits immediate circumstances
- Maintains transaction integrity and security
- Low acquisition and operating costs
